

Scientific Monographs Published during 2010-2019

1. **M. Ashordia**, The Initial Problem for Linear Systems of Generalized Ordinary Differential Equations, Linear Impulsive and Ordinary Differential Systems. Numerical Solvability. *Mem. Differential Equations Math. Phys.* **78** (2019), 1-162.
2. **T. Buchukuri, O. Chkadua, R. Duduchava** and D. Natroshvili, Interface crack problems for metallic-piezoelectric, *Mem. Differential Equations Math. Phys.* **55** (2012), 1-150. Free access: <http://www.rmi.ge/jeomj/memoirs/vol55/contents.htm>
3. **T. Buchukuri, O. Chkadua** and D. Natroshvili, mathematical problems of generalized thermo-electro-magneto-elasticity theory. *Mem. Differential Equations Math. Phys.* **68** (2016), 1-166.
4. **T. Datuashvili**, Categorical, homological, and homotopical properties of algebraic objects, *J. Math. Sci. (N.Y.)* **225** (2017), no. 3, 383-533.
5. **ო. ძაგნიძე**, ფურიეს ანალიზი, თსუ-ს გამომცემლობა, 2015, 274 გვ. (სახელმძღვანელო).
6. **L. Ephremidze**, *Real Analysis Methods in Ergodic Theory*, Nova Science Publishers, New-York, USA, 2012.
7. **V. Gogokhia** and G.G. Barnafoldi, *The Mass Gap and its Applications*, World Scientific, 2012.
8. **N. Inasaridze**, Some aspects of homotopic algebra and non-Abelian (co)homology theories. Translated from *Sovrem. Mat. Prilozh.* No. 93 (2014). *J. Math. Sci. (N.Y.)* **213** (2016), no. 1, 1-129.
9. **ა. ხარაზიშვილი**, კომბინატორული გეომეტრიის ელემენტები, ნაწილი I, (ინგლისურ ენაზე: **A. Kharazishvili**, *Elements of Combinatorial Geometry, Part 1*), საქართველოს მეცნიერებათა ეროვნული აკადემიის გამომცემლობა, თბილისი, 2016, 300 გვ.
10. **A. Kharazishvili**, *Strange Functions in Real Analysis*. third edition, Chapman and Hall/CRC, New York, 2017.
11. **S. Kharibegashvili**, Some local and nonlocal multidimensional problems for a class of semilinear hyperbolic equations and systems. *Mem. Differ. Equ. Math. Phys.* **75** (2018), 1-91.
12. **V. Kokilashvili, A. Meskhi**, H. Rafeiro and S. Samko, Integral operators in non-standard function spaces: Variable exponent Lebesgue and amalgam spaces, Volume 1. *Birkäuser/Springer, Heidelberg*, 2016, 576 pages.
13. **V. Kokilashvili, A. Meskhi**, H. Rafeiro and S. Samko, Integral operators in non-standard function spaces: Variable exponent Hölder, Morrey-Campanato and grand spaces, Volume 2. *Birkäuser/Springer, Heidelberg*, 2016, 428 pages.
14. **V. Kokilashvili** and **V. Paataashvili**, *Boundary Value Problems for Analytic and Harmonic functions in Nonstandard Banach Function Spaces*, Nova Science Publishers, New-York, USA, 2012, 275 pp.
